

River Breeze Air Conditioning, Refrigeration & Electrical Pty Ltd provides solutions for domestic, commercial and industrial applications. Our company focus is to design, construct and maintain specialised domestic and light commercial applications in the new and existing building markets. With a view that our care and attention to detail will offer our clients a service that is unsurpassed in all aspects of sales, installation and service.

The works we have carried out indicate that we are more than capable of providing our clients this service in all aspects of the building market, whether it be for a simple Room Air Conditioner to fully Ducted Systems or VRV application.

River Breeze, together with the support of Climat Air Control & Energy Centres has the in-house ability to Design and Construct Air Conditioning Systems for any application in the Building Market suitable for a lifestyle or business environment.

Our staff are fully trained and qualified and are capable of offering our clients professional service and advice in purchasing and maintaining their investment. This brings great peace of mind.
